## SUMMARY

An engineer with exceptional front-end development skills and a passion for user experience. I'm highly motivated to strengthen any organization. Strong leadership and communication skills with a mind for business backed by over four years of management experience. I'm pursuing a development opportunity where I can make a positive contribution towards success and growth.

## EDUCATION

### Web Development

Coding Dojo, Silicon Valley  
Python, PHP and MEAN

March 2016

### B.S., Business Management

San Jose State University, CA

May 2013

## EMPLOYMENT

### Lead Web Developer/Manager 04/2017 – 06/2018

**Morocco Method Int'l - shop. Morroccomethod.com, www.morroccomethod.com/blog, Grover Beach, CA**  
**www.qigongmastery.com, www.thehairshaman.com**

Technologies: PHP, WordPress, JavaScript, JQuery, HTML, CSS, PhotoShop, Illustrator, NetSuite, Bronto, SurveyMonkey, WooCommerce, Google Analytics

- In charge of the redesigning of four websites, front-end/back-end development, website security, reducing page load times, improving overall user experience and any other administrative duties of website.

- Lead a team of eight to creating beautiful product ads, web pages, e-mail blasts and set up sales campaigns.

- Improved SEO, mobile responsiveness, UI/UX design, front-end and back-end development, debugging for four separate websites, adding products to shop, content management and A/B testing.

\*Notable Achievements: Completely redesigned four separate websites, increased web traffic significantly, created new product categories, improved load time of all pages and improved SEO rankings.

### Front-end Software Engineer 06/2016 – 11/2016

**Laplace Systems - www.Solar-Link.net**

Campbell, CA

Technologies: Java, Spring, Apache, PHP, MySQL, JavaScript, JQuery, HTML, SASS, AWS, Xcode, Google Analytics

- Data mining, debugging, progress reporting, monitoring solar site activities, demoing prototype hardware, code reviewing and customer support.

- Back and front-end development with an emphasis on creating new front-end UI features and customer support.

- Enhanced the overall success of the business and software interface through updates to the front and back end of the website.

\*Notable Achievements: Made software entirely mobile responsive and cross-browser compatible, updated entire database to include all models of solar panels, improved load time of software and revised SEO of application.

### Lead Front-end Developer 05/2016 – 05/2016

**Good Karma Bikes - www.GoodKarmaBikes.org**

San Jose, CA

Technologies: Ruby on Rails, Angular.js, MySQL, JavaScript, JQuery, HTML, CSS, Google Analytics

- Lead a team of twelve to develop the UI/UX of the front-end and admin front-end of the website.

- Duties included: implementing SEO, analytics, front-end development, debugging and creating mobile features.

\*Notable Achievements: Helped create a back-end portal, so the owners could edit and update their website freely with any coding knowledge.
